The IASLIC 30th National Seminar 2024 will be organised in collaboration with the Department of Library & Information Science, Aligarh Muslim University, Aligarh, Uttar Pradesh, India and is scheduled to be held at the Aligarh Muslim University, Aligarh, during November 21-23, 2024.

Information literacy (IL) was impressively articulated by the American Library Association (ALA) through their professional rhetoric such as the Final Report of ALA, Information Literacy Standards and Information Literacy Models of learning outcomes etc. This early rhetoric is the most widely accepted articulation and rationale for IL that continues to provide a framework for discourse in the new age of information. In the other words, IL is knowing when and why one needs information, where to find it, and how to evaluate, use and communicate in an ethical manner. The concept of Information Literacy was built upon decades long efforts of the library professionals to help users to learn about and how to utilise the resources of their Library/Information Centre. With the emergence of new technologies, information literacy skills enable individuals to navigate the vast informational landscape effectively. At this juncture, Library/Information Centres should indicate analytical and critical skills among its user community to formulate search queries and to evaluate the results, and skills to search, to identify, access to a variety of information types to meet the information needs. In pursuance of IL standards and IL models, libraries/information centres would enlighten its user community to cope with the new age requirement of sustainability and lifelong learning. Emphasising the ongoing importance and impact of Information Literacy in the society, IASLIC has selected 'Information Literacy for Developing Enlightened Library/

**Information User Community in New Age'** as the main theme of its 30th National Seminar 2024 expecting fruitful outcomes out of the deliberations and discussions. In addition, when IL is discussed, IASLIC feels, differently abled users should be encouraged to take part by satisfying their information needs overcoming all barriers. Assistive technologies could bridge the gap emerged due to digital divide among such people in the society. At the same time, the application of artificial intelligence would raise the library service quality. Thus, there will be deliberations on these two themes at the meetings of SIG01 (Social Science Information): **Bridging the Information Gap of Differently-abled Library Users** and SIG02 (Computer Applications in Libraries): **Raising Library Service Quality through Application of AI** during the conference. In this context, discussions on two pertinent issues, among many others are felt important. Research Papers are invited on the following areas of the main theme of the conference and the themes of SIG Meetings for deliberation during the conference.

## IFLA Strategy 2024-2029

IFLA has designed a document to take IFLA through its centenary in 2027 and almost up to the end of the United Nations' 2030 Agenda for Sustainable Development. It is strongly rooted in the input provided by the global library field. Through a series of surveys and workshops, it was learnt about how to use their Strategies, which issues mattered most for the people, and what IFLA all wanted to see in 2029.

These led the Governing Board towards a document that:

- Makes a clearer connection between what we do and the results we want to see
- Is more easily adaptable and adoptable by library and information workers, libraries and library associations globally
- Underlines the role of libraries as development actors, working to enable their communities

The Strategy has a new and clearer vision: Sustainable futures for all through knowledge and information. It also focuses on three impact areas:

- Impact area 1: Libraries are connected and energised through vibrant, global professional communities
- Impact area 2: Libraries are recognised, represented and valued as partners
- Impact area 3: Libraries are enabled to deliver meaningful change at all levels

This work is underpinned by the enabler:

Future-Proofing IFLA: Ensuring IFLA's governance, projects, and partnerships are effective, transparent, and innovative. The Strategy is available at <https://repository.ifla.org/handle/20.500.14598/3497> one can find a set of indicators that will help us and you track progress.
